

# JOURNAL OF CLINICAL AND EXPERIMENTAL INVESTIGATIONS

pISSN 1309-8578 eISSN 1309-6621 Volume 4 Issue 4 December 2013

## ISSUE HIGHLIGHTS

- Risk factors for recurrence and morbidity in reoperative thyroid surgery
- Expression of voltage-gated sodium channel in primary tumors
- Long-term changes in sexual functions following complicated pregnancies and deliveries
- Assessment of mean platelet volume in chronic obstructive pulmonary disease
- Induced pluripotent stem cells and cell therapy
- Acute kidney injury due to rhabdomyolysis after status epilepticus

## ABOUT THE COVER

- **Copenhagen rat model of prostate cancer.** Photomicrographs of paraffin sections of a representative primary tumor and corresponding lung metastasis (hematoxylin and eosin staining). **A:** Primary tumor, low magnification, **B:** Primary tumor, high magnification, **C:** Lung metastasis, low magnification (arrows indicate metastatic lesion) and **D:** Lung metastasis, high magnification.
